

ATIF SHAIKH

Forward Deployed Engineer · Full-Stack AI Engineer

aatif2003@gmail.com | India | +91 9769550173 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack AI Engineer who designs, builds, and deploys production LLM applications end-to-end (0→1). 10 years of experience spanning software development (5 years) and enterprise client coordination (5 years). Deploy RAG systems and Azure OpenAI integrations for 200+ enterprise users; independently build and ship AI platforms including an AI writing assistant, an SEO content platform, and a trading system. Strong foundation in Transformer architecture, LLM fine-tuning, and open-weight models (Llama, Mistral), with hands-on model training and classical ML. Skilled at remote collaboration across US/EU timezones, enterprise integration (M365, OAuth2, legacy systems), and translating customer problems into working production code.

TECHNICAL SKILLS

- **AI/ML:** Transformer Architecture, LLM Fine-Tuning (LoRA/QLoRA), Open-Weight Models (Llama, Mistral), Classical ML (scikit-learn), RAG Architecture, Vector Databases (ChromaDB), LLM Orchestration, Prompt Engineering, NLP
- **AI Platforms & APIs:** OpenAI API, Anthropic Claude, Azure OpenAI, Google Gemini, LangChain
- **Languages & Frameworks:** Python, JavaScript, TypeScript, SQL, React, Node.js, Next.js, Express
- **Databases & Infrastructure:** PostgreSQL, MongoDB, ChromaDB, Redis, Docker, WebSockets, REST APIs, ETL Pipelines
- **Enterprise Integration:** Microsoft 365, Microsoft Graph API, Azure AD, OAuth2, JWT, PowerShell, WordPress API, Stripe
- **Customer Engineering:** Remote deployment, Client negotiations, Pre-sales POCs, SEV-A incident response, Stakeholder management, Live customer support

PROFESSIONAL EXPERIENCE

Software Engineer – Enterprise AI Solutions | [LTI Mindtree](#) Dec 2024 – Present

- Work remotely with US and European enterprise clients deploying AI solutions; conduct virtual discovery sessions across multiple time zones diagnosing operational bottlenecks
- Built a 4-agent market-research chatbot for P&G's internal research team using LangGraph orchestration, deployed on Google Vertex AI; supports product-research surveys and understands user intent to route each query to the right specialized agent
- Deployed Azure OpenAI + Microsoft Graph API automation integrating with OAuth2, Azure AD, and legacy databases; eliminated 60% manual processing for 200+ daily users across 4 departments
- Built production RAG chatbot (Google Voice API, OpenAI embeddings, ChromaDB vector search, GPT-4) reducing inventory analysis from 2+ hours to under 30 seconds with 85% accuracy
- Collaborate with sales on pre-sales technical evaluations; deliver remote product demos to stakeholders supporting deal scoping

Software Engineer – Enterprise M365 | [Sherweb](#) Nov 2021 – Nov 2023 · Remote

- Provided direct technical support to enterprise customers on M365 platform (Exchange, SharePoint, Teams, Azure AD) maintaining 99.5% uptime SLA
- Acted as SME for SEV-A incidents; worked remotely via screen sharing to restore services within 2-hour SLA; collaborated with Microsoft engineering on tenant-level failures
- Built monitoring tool (Microsoft Intune + Graph API) reducing detection time by 45%; developed React/PostgreSQL ticketing system reducing response time by 35%

Developer (Freelance) | [Upwork](#) Dec 2019 – Aug 2020 · \$20K+ earned · Remote

- Delivered M365 support for 15+ enterprise clients; built e-commerce solutions (React, WordPress/WooCommerce) with payment integration
- Developed SEO-optimized landing pages with performance optimization and analytics tracking improving client conversion rates

Technical Operations & Client Coordination | [Etisalat](#) Nov 2013 – Oct 2019 · Dubai, UAE

- Managed client coordination and negotiations across 3 engineering teams for telecommunications infrastructure; provided live customer support resolving escalations and service issues

- Coordinated incident response managing triage, escalation workflows, and post-incident reviews; served as primary liaison between technical teams and enterprise clients
- Facilitated stakeholder communication and negotiated service agreements maintaining high client satisfaction

SELECTED PROJECTS

Enterprise client projects are confidential under NDA. Projects below demonstrate independent technical range.

CryptoClever – Multi-Agent Trading System | Under Testing / Pre-Deployment | [Live](#)

- Agentic trading platform built with LangGraph: 4 autonomous agents — Scalp and Long-signal agents running 24/7 live on an Azure VM, plus 2 algo-trading agents executing live trades on Binance via their own decision logic
- Each signal passes 14 parameter checks including live news integration before firing; agents combine technical indicators to time entries
- ~60% signal accuracy in testing | Tech: LangGraph, Python, Binance API, Azure VM, WebSockets, ChromaDB

WriteBookAI – AI Ghostwriter | Live Production | writebookai.com

- Ghostwriter that extracts an author's voice DNA to write full chapters in the author's own style — a direct competitor to leading AI writing tools
- Writes and discusses ideas like a real writing partner; 170+ active authors | Tech: React, Node.js, PostgreSQL, OpenAI/Claude/Gemini orchestration, Stripe

EDUCATION

- **B.E. Electronics & Communication** – Visvesvaraya Technological University, Bangalore
- **MBA** – Sikkim Manipal University, 2013
- **Advanced Full-Stack Development Bootcamp** – MERN Stack, System Design, Crio.do, 2020

ADDITIONAL INFORMATION

- Experienced working remotely with European and US clients across multiple time zones; open to relocation
- Work authorization: Indian citizen, open to US/EU sponsorship
